Summary

Enthusiastic Full Stack Developer and MCA student with a strong foundation in React.js, React Native, and modern JavaScript. Hands-on experience through academic and real-world projects in building responsive web and mobile applications, integrating REST APIs, and managing application state using Redux. Passionate about learning scalable application development, clean UI design, and backend integration using Node.js and MongoDB. Possess hands-on experience with backend development using Node.js and MongoDB, including database design, API development, and basic authentication workflows. Passionate about learning scalable application architecture, performance optimization, and best coding practices. A quick learner with strong problem-solving skills, eager to contribute to collaborative development environments and continuously grow as a full-stack professional.

Education

Master of Computer Applications (MCA)	2024 – 2026 (Pursuing)
Bachelor of Computer Applications (BCA)	2020 – 2023
Ducat Ghaziabad	2023 – 2024 Remote
<i>Full Stack Developer, Apprenticeship</i>	<i>Ghaziabad</i>

- ❖ Gained hands-on experience in React.js, JavaScript (ES6+), HTML5, CSS3, Redux, Tailwind CSS, building responsive front-end components and single-page applications.
- ❖ Collaborated with UI/UX designers to implement Figma wireframes into responsive React.js pages.

Projects

[lch.com](#) | Tailwind CSS, JavaScript, React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT, Passport.js, Cloudinary, Toastify

- ❖ **User Side:** Users can sign up, log in, choose doctors based on specialty (e.g., Gastroenterology, Neurology), view doctor profiles with qualifications, and book or cancel appointments seamlessly.
- ❖ **Doctor Dashboard:** Doctors can manage their appointments, view payments, and track patient information, optimizing their workflow and saving time.
- ❖ **Admin Panel:** Admins can add new doctors, manage their availability, and control the overall platform, ensuring smooth operations.
- ❖ The platform features role-based access control to ensure secure and organized interactions between users, doctors, and administrators. Emphasis is placed on performance, data security, and scalability to support future feature expansion and real-world healthcare use cases.

Technologies & Benefits: The app is responsive, with modern tools like JWT for secure authentication, MongoDB for flexible data storage, and Cloudinary for efficient image management, providing a scalable and user-friendly experience.

Position of Responsibilities

- ❖ **Group Coordinator (2020-2023)** Coordinated and managed college-level activities under the National Service Scheme (NSS).
- ❖ Led teams, organized events, and facilitated community initiatives, fostering teamwork, leadership, and social responsibility.

Technical Skills

Languages : JavaScript (ES6+), Core Java

Frontend : React.js | React Native (Expo, Components, Navigation) | React Router Context API | HTML5 | CSS3 | Tailwind CSS | Responsive Design |

Backend : Node.js | Express.js | REST APIs | Postman

Database : MongoDB, Mongoose.

Tools & Deployment : Git | GitHub
